

MyPhileas®

Application dedicated to the Genius range Phileas® Genius®, 25, 75 and 250.

Provides remote management, monitoring of zone and editing your disinfection protocols

Optimizes your quality procedures through automatic traceability

An immediate connection and multiple control...

MyPhileas® can manage multiple **devices connected simultaneously**.

Each Phileas® is equipped as standard with a modem that **instantly connects to** the tablet as soon as it is within the wireless coverage area .

Program... and ... Remote control

MyPhileas® : The disinfection dedicated application

Installed directly on the tablet, the MyPhileas® application is specially designed for remote control of all Phileas® devices in the range.

Totally intuitive in its operation, **it takes into account all parameters of disinfection and allows a high level of traceability** :

- Programming areas ,
- Cycle traceability / Quality data,
- Follow process outside of the area,
- Automatic distribution of reports generation (pdf) directly searchable and archivable .

MyPhileas® runs Android .
